CHAPTER 5

THEME 4: MUSIC HISTORY AND LITERATURE

The music history and literature exercises include measures of knowledge about the periods of music history, musical genres and styles and music literature. The exercises measuring knowledge of history and literature include not only the traditional European art music of the eighteenth and nineteenth centures, but also popular music, folk music, music of earlier periods and electronic music.

Most of the questions about the periods of music history were of the traditional pencil-and-paper variety. Respondents were asked to indicate the chronological order of five, broad style periods, to identify representative composers from each period and to match period names with short descriptions of their characteristics. Other questions required classifying unidentified recorded performances into one of the periods.

Exercises in the second group required less knowledge of chronology, but did require the ability to discriminate between the styles of several recorded selections. Several exercises in this group, for example, ask which of three works were probably composed by the same person. Other exercises ask for the names of various genres and jazz styles.

The final group of exercises asks for the composer, title or words of several recorded selections. Some are traditional American songs; others, familiar classical selections. For the most part, history and literature exercises were not administered to 9-year-olds.

Five periods of music history are listed in four different orders below. Fill in the oval beside the listing which is in the correct chronological order from the earliest period to the most recent period.

The history of music may be divided into five periods, each with a distinct musical style:

Renaissance (representative composer: Palestrina)
Baroque (representative composer: J. S. Bach)
Classical (representative composer: Mozart)
Romantic (representative composer: Tchaikovsky)
Modern (representative composer: Stravinsky)

Listen to the recordings of eight musical selections. Each one is representative of one of the five periods of music history. It may or may not have been written by a composer listed above. As you listen to each selection, fill in the oval beside the period of music history which it represents. If you do not know the answer, fill in the oval beside "I don't know."

Musical works by the same composer often sound similar. Listen carefully to three musical examples. Which examples were probably composed by the same person?

The works probably composed by the same person are

○ 1 and 2 only.
● 1 and 3 only.
○ 2 and 3 only.
○ all 3.

○ I don't know.

STOP DO NOT GO ON TO THE NEXT PAGE UNTIL TOLD TO DO SO.

(This exercise involves the use of the STIMULUS tape recorder. Remember to turn the STIMULUS tape recorder on and off with the REMOTE CONTROL SWITCH.)

Listen carefully to the songs that will be played on a piano. Tell me the name of each song.

(Turn on the STIMULUS tape recorder and play selection A.

Stop the STIMULUS tape recorder after each selection has been played.

For each selection, if respondent says he does NOT know the title ask, "Can you tell me some of the words of the song?" *Write down as many words as respondent can remember, until the space for the words is used up.*

If no response is given in 10 seconds, go to the next selection.)

(This exercise involves the use of the STIMULUS tape recorder. Remember to turn the STIMULUS tape recorder on and off with the REMOTE CONTROL SWITCH.)

Listen carefully to the following musical selections. Name the title of the selection and the composer.

(Turn on the STIMULUS tape recorder and play selection A.

Stop the STIMULUS tape recorder after each selection has been played.

Be sure to ask respondent for BOTH the title AND the composer of each selection.

For each selection, if respondent says he does not know the title ask, "Can you tell me the name of the composer?"

If no response is given in 20 seconds, go to the next selection.)

CHAPTER 6

THEME 5: ATTITUDES TOWARD MUSIC

The exercises that measure an individual's interest in and attitudes toward music-relate to three basic issues. The first is whether people like to listen to music, what types of music they like to listen to and what communications media they turn to. The second issue involves attitudes toward singing: Do people like to sing? Alone or with others? In large groups or small? What kinds of songs do they like to sing? The final issue relates to attitudes that involve playing an instrument: Do people play? If not, would they like to? Do people prefer playing alone or with others? What kinds of music are generally preferred?

How often do you seek out and listen to music that you like to hear on each of the following?

A. Television

- ☐ Less than once a month
